ERIH Initial List: Pedagogical and Educational Research (2007)

European Reference Index for the Humanities (ERIH) is a project jointly sponsored by ESF and the European Commission ERA-Net project "Humanities in the European Research Area" (HERA) (Contract no.: ERAC-CT-2005-0161179). It comes under work-package 7 (Research Infrastructures).

The ERIH lists will help identify excellence in Humanities scholarship and should prove useful for the aggregate benchmarking of national research systems, for example, in determining the international standing of the research activity carried out in a given field in a particular country.

As they stand, the lists are not a bibliometric tool. The ERIH Steering Committee and the Expert Panels therefore advise against using the lists as the only basis for assessment of individual candidates for positions or promotions or of applicants for research grants.

Expert Panel Scope Note: The panel "Religious Studies and Theology" understood its scope to cover the two complementary academic disciplines of (a) Theology (as widely understood in Europe) and (b) Religious Studies (or "the Study of Religions" etc.). Journals were therefore considered, over a wide range, which publish articles on religious systems and movements across the world, taking into account their textual and intellectual traditions, their history and sociology, comparative and theoretical questions, and so on. It is recognised that in most of its sub-disciplines (New Testament Studies, Church History, etc.) academic theology makes use of several critical methods which are used in the study of religions other than Christianity. On the other hand, journals devoted mainly to the self-promotion of particular religious movements or standpoints are not included.
